

FEMMInterpreter

Output Class Attributes

Magnetic Attributes

Attribute	Type	Description
format_version	float	The FEMM file format version number.
frequency_hz	float	Operating frequency in Hertz for AC analysis.
solver_precision	float	Numerical precision tolerance for the solver.
min_angle_deg	float	Minimum angle in degrees for meshing constraints.
model_depth	float	Depth of the model in the z-direction (for 2D axisymmetric).
length_unit	str	Unit system for length measurements (e.g., 'millimeters', 'inches').
problem_type	str	Type of analysis (e.g., 'planar', 'axisymmetric').
coordinate_system	str	Coordinate system used (e.g., 'cartesian', 'polar').
comment_text	str	User-defined metadata or notes about the model.
